OPERATING INSTRUCTIONS FOR LED-RGB-MUSIC

1. Specifications:

Working Temperature: - 20-60°C

Supply Voltage: DC12~24V

Output: Three CMOS drain - open output
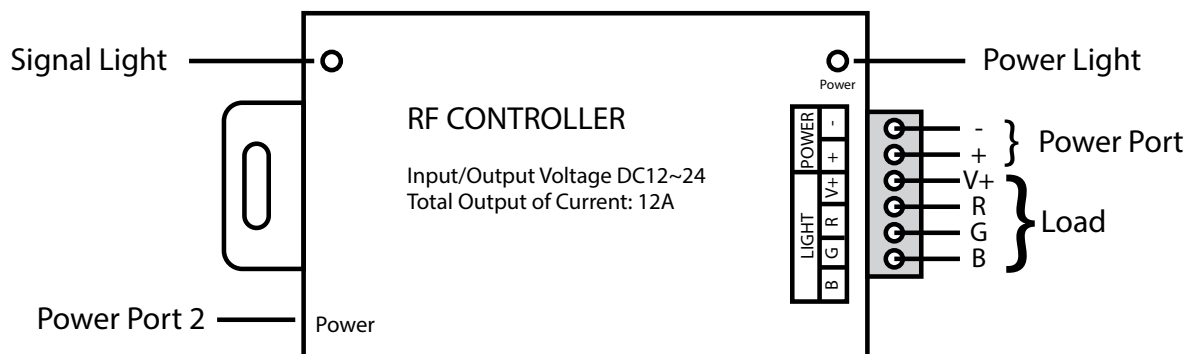

Connecting Mode: Common anode

Max Load Current: 4A each color

2. Control Method:

The functions of each wireless control method are displayed in the table below.

Brightness +	Brightness -	Pause	ON/OFF
Static Red	Static Green	Static Blue	Static White
Static White	Static Yellow	Static Cyan	Static Purple
Sound Control (Four Mode)	Three Base Color Jumpy	Three Color Gradual Change	Speed +
Flash	Seven Base Color Jumpy	Seven Color Gradual Change	Speed -

3. Panel Specification and Connecting Drawing

4. Warnings:

1. Supply voltage of this product is DC12V~24V. Never connect AC220V.
2. Never connect two wires directly in case of a short circuit.
3. The lead wire should be connected correctly according to the colors on the connecting diagram.
4. The warranty of this product is one year. During this period we guarantee replacement or repairing with no charge but exclude the artificial situation of damaged or overload working.
