

# Installation Guide Clip 50 - US

Material	High Strength Reinforced Nylon	
Colour	Black	
Fixing Method	8G Screws (5x) or Glue	

Hold the component in place and fasten to the substrate with 8G screws. Repeat for matching component. Ensure sufficient screw embedment in substrate.

#### Flush Mounting

Mark center lines, vertical and horizontal, on both substrates. Flush mounting requires no additional preparation. Line the notches in each component (Hook shown here) with the center lines. **Mark-Out Template** can also be used.

Prior to assembly, establish whether the joint is to be permanent or disassemblable.

Assemble the joint remembering the Clip 50 only needs to travel 1 pitch for full engagement. Alignment lines are deigned into the parts to help with assembly.

When assembled, the substrates will be separated by the thickness of the engaged Clip 50.

# Rebate Mounting

**Part Rebate** - each substrate mounting face is rebating as shown. Ensure sufficient screw embedment in substrate.

**Full Rebate** - 1 of the substrate mounting faces is rebating the full depth as shown. Ensure sufficient screw embedment in substrate.

# Set-Back Mounting

Setting back the mounting face of either the Hook (as shown) or Key by 9.5mm results in a concealed joint without the need to cut rebates.

# Installation Aids

	STRIPLOX	Centreline	Une B	Mini 120 Router Cut Mark-Out	-4-
>	S Mini 60 Router Cut Mark-Out	120	=		86 Q04
	1800 JOINLOX 191 Joinlos.com/striptox W	Mini 60 /	MIni 120	Clip 80	

**Striplox Clip 50 Jig** Designed to be used in conjunction with either the Clip 50 Key or Hook to mark screw locations in a wide variety of substrates. Striplox Mark-Out Template Developed to aid in the installation of the Striplox Pro 23, Pro 55, 90D 98, Clip 50, Mini 60 and 120.

### Load Capacity

Direction	Indic. Load Capacity
А	209 lb
В	209 lb
С	275 lb

- Tested using particle board and fixed with screws.
- Ensure sufficient screw embedment in substrate.
