STRIPLOX™

Hook — Key

| Material	High Strength Reinforced Nylon
Colour	Black
Fixing Method	8G Screws (8x) or Glue

Flush Mounting

1
Mark center lines, vertical and horizontal, on both substrates. Flush mounting requires no additional preparation. Line the notches in each component (Hook shown here) with the center lines. **Mark-Out Template** can also be used.
2

Striplox Liquidlox can also be used for mounting the Pro 55.
Hold the component in place and fasten to the substrate with 8 x 8G screws. Repeat for matching component. Ensure sufficient screw embedment in substrate.
3

OPTIONAL

Remove locking tab on the Hook if you wish to create a disassemblable joint. This is best done with a sharp utility knife.

Prior to assembly, establish whether the joint is to be permanent or disassemblable.

4

Assembly the joint remembering the Pro 55 only needs to travel 1 pitch for full engagement.
5

See second page for **Rebate** and **Set-Back** mounting options.

When assembled, the substrates with be separated by the thickness of the engaged Pro 55.
Rebate Mounting

1

Part Rebate - each substrate mounting face is rebating as shown. Ensure sufficient screw embedment in substrate.
2

Full Rebate - 1 of the substrate mounting faces is rebating the full depth as shown. Ensure sufficient screw embedment in substrate.

Set-Back Mounting

1

Setting back the mounting face of either the Hook (as shown) or Key by 0.5" results in a concelled joint without the need to cut rebates.
Installation Aids

Striplox Mark-Out Template
Developed to aid in the installation of the Striplox Pro 55, 90D 98, Mini 60 and 120.

Striplox Liquidlox
Instant adhesive with a 15 second cure time. Liquidlox delivers a strong and reliable connection between Striplox products and most substrates.

Load Capacity

Direction	Indic. Load Capacity
A	440 lb
B	233 lb
C	440 lb

- Tested using particle board and fixed with screws.
- Ensure sufficient screw embedment in substrate.
