Here at Outwater we have been working closely with germ protective needs for decades. We currently have ample stock in the US for all products and ready to ship same day. Please understand that there is always a solution to your PPE needs. Our staff has years of experience - we're here to help from a supplier and a consultation standpoint. Tell us your challenges and we'll help you find a solution. Being able to resume business at this time is absolutely paramount and we hope you consider using our knowledge and products to get your business back on the path to success.

Sincerely,
Outwater Industries Inc
Outwater’s AT Tubing system consists of a series of tubes and connectors that can be joined together to create a wide range of partitions for social distancing.

The beauty of the system is how easy it is to assemble. Using our various components even those without prior experience can quickly fashion all types of structures simply by fitting the system’s components together.

With various angled, multi-sided connectors, what you create is limited only by your imagination.
During these uncertain times, Outwater is committed to assisting our customers and the communities we serve to conceptualize, design, and produce the structures they require to keep their businesses operating safely and responsibly.

From clean rooms, to temperature screening booths, to pop-up hospital rooms, our seasoned and knowledgeable staff is available to help you create any structure you require.

Let us help. Call today for consultations, questions, and quotes.
